

Dear FCC,

After the monopolistic consolidation of radio after the telecommunications act of 1996, how dare you propose further deregulation? It will hurt consumers and help the corporations who have been flying your officials around the world, putting you up in expensive hotels, and working to ensure themselves full control of local and national media. Mr. Powell, as a black man I would hope you understand the importance of diversity in media ownership so everyone gets a chance to speak and be heard. Seeing how you have all sold yourselves out and the citizens of the united states out, I hope you somehow come to your senses and stop this media deregulation. You should all have great shame. You no longer watch out for citizens and consumers, you only watch out for corporations.
